

NoteBridge 1 - Cost Estimation

Must - high priority

Should - Medium priority

Could - lowest priority

No.	User Story	Story Points	Duration ("Ideal Days")
1	The system must provide a registration process for users to sign up and create their profiles.	10	4
1.1	The system must provide users with the possibility to log in to their accounts.	5	2
1.2	The system must allow users to create a profile for their account	3	1
1.3	The system must let the user choose whether they want to create a student account or a teacher account.	2	1
2	The system must allow teachers to put their skills, qualifications and teaching experience on their profile.	12	4
2.1	The system must allow users to search for teachers based on location.	3	1
2.2	The system must allow users to search for teachers based on musical skills.	3	1
2.3	The system must allow users to search for teachers based on experience level.	3	1
2.4	The system must allow users to search for teachers based on availability.	3	1
3	The system should allow teachers to mark the days and times when they are available.	10	4
3.1	The system must allow students to schedule lessons with their chosen teachers.	5	2
3.2	The system could allow the users to receive notifications about their lesson booking, cancellations and other announcements.	3	1
3.3	The system could allow teachers to put their videos showcasing their skills on their profiles.	2	1
4	The system must have a secure payment gateway that receives payments from users (students).	10	4

4.1	The system could allow teachers to only receive their payment after the lesson has been ended by the teacher.	2	1
5	The system must allow the user to have contact with the platform administrators for assistance (real-time chat; email communication; list of contacts).	4	2
5.1	The system must provide a FAQ page for users that will aid in solving common problems.	1	1
6	The system must have a drop-down menu where users can switch between the different functionalities of the system such as the map, the lessons overview and their profile.	3	1
7	The system must allow users to provide feedback on their experience with teachers and the platform.	5	2
7.1	The system must allow users to provide ratings for teachers.	2	1
8	The system should provide users with a visual map where each teacher's location will be associated with a bubble containing the instrument taught.	4	2
8.1	The system should display the number of teachers in a given area on the visual map.	3	1
9	The system could have an admin dashboard for the administrators.	5	2
9.1	The system could allow administrators to manage user accounts and teacher profiles on the admin dashboard.	3	1
9.2	The system could allow administrators to manage different settings on the admin dashboard.	3	1
9.3	The admin dashboard could display metrics and data analysis of the system for example showing the amount of bookings and revenue generated.	3	1
