NoteBridge 1 – Design Report

This report provides an overview of the website's design, including the tools used, colour scheme, and the status of various page designs and features.

For the design process of NoteBirdge, the team utilized Figma, a collaborative interface design tool. Figma allows for the creation of design prototypes, wireframes, and visual elements that serve as a foundation for the development process. (Figma overview link)

The colour scheme for NoteBirdge follows the 60-30-10 rule, which ensures a balanced and visually appealing design. The selected colors and their respective proportions are as follows:

1. Dominant Color (60%): Purple (#8A3EB7)
   o The dominant color is the primary hue used throughout the platform, typically for backgrounds and larger design elements.
2. Secondary Color (30%): Beige (#F2B84A)
   o The secondary color supports the dominant color and is used for smaller design elements or as an accent color.
3. Accent Color (10%): Light Lavender (#F5F5F5)
   o The accent color adds visual interest and balance to the design and is used sparingly.

The design process of NoteBirdge has made significant progress, with multiple pages and features already having initial designs realized in Figma. These include:

1. Main Page (Desktop & Mobile):
   o The main page serves as the entry point for users and provides an overview of the platform's features and services.
2. Registering Pages for Students and Teachers:
   o These pages allow students and teachers to create their accounts on NoteBirdge and provide necessary information.
3. Login Page:
   o The login page enables users to access their accounts securely.
4. Map with Teachers:
   o The map page displays the location of available teachers, making it easier for students to find tutors in their area.
5. Profiles for Teachers and Students:
   o The profile pages allow users to showcase their information, qualifications, and areas of expertise.
6. Profile Settings:
   o The profile settings page allows users to customize and manage their account settings.
7. User Chat:
   o The user chat feature facilitates communication between students and teachers within the platform, enabling them to discuss lessons and ask questions.
8. Notifications:
   o The notifications page displays important updates, such as lesson requests, messages, and system notifications.
9. Lessons Search Page (with Applied Filters):

- o The lessons search page allows students to search for teachers based on various criteria.
10. FAQ Page:
    - o The FAQ page provides answers to commonly asked questions, helping users find solutions to their queries.
11. Contact Page:
    - o The contact page provides contact information and a form for users to get in touch with the support team.
12. Support Chat:
    - o The support chat feature enables users to communicate with the support team for assistance and guidance.
13. Teacher Reviews:
    - o The teacher reviews page allows students to provide feedback and ratings for the teachers they have worked with.
14. Creating & Booking Lessons:
    - o These pages enable teachers to create lesson listings, set availability, and allow students to book lessons based on their preferences.

Pending Page Designs:

1. Payment Page:
    - o The payment page is crucial for facilitating transactions between students and teachers. It will allow users to make payments securely.
2. Admin Profile:
    - o The admin profile page is essential for administrative purposes and will provide tools for managing the platform.

NoteBirdge's current design serves as the initial version, but it is expected to undergo further changes throughout the development process.
